ANNUAL ANNOUNCEMENT,

1884-'85.

The collegiate year of the St. Louis Medical College embraces a Spring session and a Winter session.

The Spring session of 1884 began on March 10th and continued eleven weeks.

The forty-third regular Winter session will commence on Monday, September 22d, 1884, and continue until March 1st, 1885. Preliminary examinations will be held on Friday of the week before the regular Winter session and of the two first weeks of the session.

The Commencement and graduating exercises will take place on Thursday, the 5th of March, 1885.

The Spring session of 1885 will begin on Monday, March 9th. A special programme will be issued in the preceding January.

The regular holidays during the Winter session will embrace Thanksgiving Day and the time between Christmas Eve and New Year's Day inclusive.

ST. LOUIS MEDICAL COLLEGE.

In the year 1876, the St. Louis Medical College made its first attempt at a thorough reform in the curriculum of studies, by offering an optional graded course of instruction of three years. Twelve students availed themselves of the new plan in the regular session of 1876-77, and the number of three years' students increased at so rapid a rate, that in the winter of 1879-80 they far outnumbered those who still pursued the old plan of two successive complete courses. At the end of that session, two-thirds of the graduates were three years' men. The Faculty, therefore, resolved to discard the old plan altogether, and made the graded course of three years obligatory. Since the spring of 1880, no student has been matriculated other than for three years, and since the spring of 1882, no candidate has received the diploma who has not pursued three courses of lectures.

Thus the St. Louis Medical College, by deliberately sacrificing numbers to improved methods, has become one of the few medical schools in the United States, and the only one west of the Alleghanies, that has succeeded in establishing a graded course of three years as an absolute condition of graduation.

Practical laboratory instruction in chemistry has been given since October, 1878, and has been made a regular part of the curriculum, so that laboratory work is now as much a *sine qua non* of graduation as anatomical practice in the dissecting room.

Histology, as an independent branch of teaching, was added in the session 1879-80, and opportunity for individual work at the microscope is now provided.

In the autumn of 1882, Pathological Anatomy was also made the subject of special teaching, with instruction in *post-mortem* practice.

Finally, for a year past, the important topics of Hygiene and Forensic Medicine have been added to the regular curriculum.

The clinical facilities of the College have been largely extended by the addition, in 1881, of the College Dispensary, with its well-attended medical and surgical, its children's clinics, its very large gynæcological, ophthalmic and genito-urinary clinics, as well as by the use of the large and valuable material of the Hospital of the Alexian Brothers.

COURSE OF INSTRUCTION.

The Course of Studies in this School extends over a period of three years, and is a graded one, the student devoting himself during the first year mainly to theoretical and demonstrative branches—the fundamental sciences of medicine, and in the second and third year gradually taking up the practical subjects and specialties.

CHEMISTRY is taught in lectures (three a week) illustrated by experiments and specimens; the course includes selected chapters on physics. The instruction in PRACTICAL CHEMISTRY in the Laboratory is given, under the supervision of the Professor of Chemistry, by the Demonstrator of Chemistry, during the Winter session to all Junior students, and during the Spring session to all who desire it.

ANATOMY.—Lectures (three a week) with practical demonstrations, and daily instruction in dissection. The anatomical rooms are under the superintendence of the Professor of Anatomy and the Demonstrators, one of whom is always present to assist the student in his anatomical studies. In addition, one hour a week is devoted to SURGICAL ANATOMY.

HISTOLOGY is taught in lectures (one a week) with the aid of magic-lantern diagrams, and by microscopical demonstrations (two a week).

PHYSIOLOGY.—The lectures (three a week) are illustrated by experiments and vivisections.

HYGIENE.—Didactic lectures (two a week, during half the term).

THERAPEUTICS AND MATERIA MEDICA.—The lectures (three a week) are illustrated by a very extensive cabinet of materia medica.

PRINCIPLES AND PRACTICE OF MEDICINE.—Didactic lectures four times a week. CLINICAL MEDICINE is taught at the College (once a week) and in the MEDICAL CLINICS at the City Hospital (once a week, Prof. Smith), at the St. Louis Hospital (twice a week, Dr. Glasgow), and at the College Dispensary (four times a week, Prof. Smith and Dr. Scott).

PATHOLOGICAL ANATOMY is taught both in connection with clinical medicine and in didactic lectures (three a week), with microscopical demonstrations and post-mortem practice.

DISEASES OF CHILDREN.—Didactic lectures once a week. Clinical lectures at the College Dispensary twice a week.

DISEASES OF THE MIND AND NERVOUS SYSTEM are treated in a separate course of lectures (one a week), with clinical illustration and lessons in electrotherapy.

SURGERY—Didactic lectures (three a week). **SURGICAL CLINICS** are conducted throughout the year by Prof. Gregory at the St. Louis Hospital (twice a week), by Prof. Mudd at the City Hospital (once a week,) and at the College Dispensary (twice a week).

DISEASES OF THE GENITO-URINARY ORGANS.—Clinic at the College Dispensary (once a week).

OPHTHALMOLOGY is taught in didactic and clinical lectures (one a week, each) at the College Dispensary.

GYNÆCOLOGY is taught in lectures (one a week) and in the **GYNÆCOLOGICAL CLINICS** of Dr. Barret at the College Dispensary (twice a week), and of Dr. Moses at the St. Louis Hospital (twice a week).

OBSTETRICS—Lectures (three a week). The course includes exercises in all the usual operations upon the manikin. Cases of midwifery are procured for the advanced students.

FORENSIC MEDICINE is taught in lectures (two a week) during half the term.

Besides these subjects, constituting the regular course of instruction, attendance upon *all* of which is required for graduation, a number of special subjects are treated in courses of lectures and clinics during the Spring session. These courses will be announced to the students in a special programme issued in the month of January preceding each Spring session.

CLINICS.

The City Hospital is visited by Profs. Smith and Mudd, who conduct the Medical and Surgical Clinics respectively.

The College Dispensary affords ample material for clinical instruction in external and internal pathology, both of adults and children. In two years and a half there have been treated 1,436 surgical cases; 1,947 cases of diseases of the genito-urinary organs; of general diseases, 10,557, making a total of 13,940. Besides, in special departments, there were exhibited to the classes in two years 413 cases of diseases of the eye and 107 of diseases of the ear; 327 cases of diseases of the throat and nose, and nearly 1,600 cases of uterine disease. The lectures on nervous diseases have been illustrated by many cases of cerebral and spinal disease, and mental alienation, even of the rarest forms. Through this Dispensary, students under the supervision of the proper instructor have opportunities of attending cases of midwifery.

The St. Louis Hospital affords in like manner great advantages for the student, being entirely under the control of the St. Louis Medical College in so far as relates to its clinical facilities. The Surgical Clinic of Prof. Gregory is unsurpassed in the variety and importance of the cases treated. During the last year there were treated in this class 241 cases; in the department for diseases of the throat and chest 407 cases; and of general diseases 543 cases. In the department for diseases of women there were treated 365 cases. In the clinic for diseases of the eye and ear 280 cases of diseases of the eye and 111 cases of diseases of the ear were presented for treatment.

The Hospital of the Alexian Brothers offers also extensive facilities for clinical studies, which have been rendered available to the College.

CURRICULUM.

FIRST TERM. (*Junior Class.*)

CHEMISTRY	Three Lectures a week.
CHEMICAL LABORATORY PRACTICE.....	Six Hours a week.
ANATOMY.....	Three Lectures a week.
SURGICAL ANATOMY.....	One Lecture a week.
DISSECTIONS	Twelve Hours a week.
HISTOLOGY.	One Lecture a week.
HISTOLOGICAL DEMONSTRATIONS.....	Two Hours a week.
PHYSIOLOGY.....	Three Lectures a week.
MATERIA MEDICA.....	Three Lectures a week.

SECOND TERM. (*Middle Class.*)

CHEMISTRY.....	Three Lectures a week.
ANATOMY.....	Three Lectures a week.
SURGICAL ANATOMY.....	One Lecture a week.
DISSECTIONS.....	Twelve Hours a week.
PHYSIOLOGY.....	Three Lectures a week.
MATERIA MEDICA and THERAPEUTICS.....	Three Lectures a week.
PATHOLOGICAL ANATOMY.....	Three Lectures a week.
PRINCIPLES and PRACTICE of MEDICINE.....	Four Lectures a week.
MEDICAL CLINICS.....	Seven Hours a week.
CLINICS for DISEASES of CHILDREN.....	One Hour a week.
SURGICAL CLINICS.....	Five Hours a week.

THIRD TERM. (*Senior Class.*)

SURGICAL ANATOMY.....	One Lecture a week.
DISSECTIONS.....	Twelve Hours a week.
PRINCIPLES and PRACTICE of MEDICINE.....	Four Lectures a week.
PRINCIPLES and PRACTICE of SURGERY.....	Three Lectures a week.
OPHTHALMOLOGY.....	One Lecture a week.
OBSTETRICS.....	Three Lectures a week.
DISEASES of WOMEN	One Lecture a week.
DISEASES of CHILDREN.....	One Lecture a week.
DISEASES of the NERVOUS SYSTEM.....	One Lecture a week.
HYGIENE and FORENSIC MEDICINE.....	Two Lectures a week.
MEDICAL CLINICS.....	Seven Hours a week.
CHILDREN'S CLINICS.....	Two Hours a week.
SURGICAL CLINICS.....	Five Hours a week.
OPHTHALMIC CLINIC.....	One Hour a week.
GYNÆCOLOGICAL CLINICS.....	Four Hours a week.
CLINIC for DISEASES of the GENITO-URINARY ORGANS.....	One Hour a week.

Faithful attendance upon all the lectures of this Curriculum is required for graduation.

EXAMINATIONS.

EXAMINATIONS FOR ADMISSION.—Henceforth, all students entering the College will be required to pass a satisfactory examination in the branches of a good English education, including English grammar, orthography and composition, mathematics, and elementary physics. Students who present a diploma or certificate of graduation from a literary or scientific college, or a high school, shall be exempt from this preliminary examination.

ADMISSION TO ADVANCED CLASSES.—Students who have attended one course of lectures in some accredited regular school of medicine may enter the Middle Class after passing a satisfactory examination in Chemistry and Anatomy. Students who have attended two such courses of lectures may enter the Senior Class after passing a satisfactory examination in Chemistry, Anatomy, Physiology, and Materia Medica and Therapeutics.

These examinations shall be wholly or in part in writing, and the orthography and grammar shall be taken into consideration in determining the merits of the student.

ANTICIPATED EXAMINATIONS.—Middle Class Students may, at the end of the second term, present themselves for examination in Chemistry, Anatomy, Physiology, Pathological Anatomy, and Therapeutics and Materia Medica (each or any of these), and if such examination in any of these branches prove satisfactory, it shall be counted final; but if not satisfactory, they shall again enter examination in that branch when they become candidates for graduation. A student who desires to avail himself of this advantage must, by the first day of February, notify the Dean, in writing, of the branch or branches in which he wishes to be examined.

REQUIREMENTS FOR DEGREE OF DOCTOR OF MEDICINE.

1. The candidate must be twenty-one years of age and of good moral character, and must have been engaged in the study of medicine for three years (courses of lectures included).

2. He must have attended *three* regular courses of lectures, the last of which must have been attended in this school. The Spring session is not estimated as a part of the courses required for graduation.

3. He must, by the first of February, notify the Dean, in writing, of his intention to become a candidate.

4. He must undergo a satisfactory examination in Chemistry, Anatomy, Physiology, Materia Medica and Therapeutics, Pathological Anatomy, Principles and Practice of Medicine, Clinical Medicine, Surgery, Obstetrics, and Hygiene and Forensic Medicine.

Graduates of other accredited medical schools may obtain the degree "*ad eundem*" by producing satisfactory testimonials from regular physicians with respect to character and professional standing, entering the Senior Class for one term, and passing a satisfactory examination in all the above mentioned branches.

FEES.

Matriculation Fee (paid but once).....	\$ 5 00
Fees for each Regular Term.....	90 00

No extra charge is made for Demonstrator's, Laboratory or Hospital tickets. The fee for the third term includes the Graduation Fee.

Fee for the Spring Session.....	25 00
---------------------------------	-------

For students who remain through the ensuing Winter session, this sum will be deducted from the fee for the regular term.

Laboratory Fee for students who work during the Spring session..	10 00
--	-------

These fees must be paid promptly at the beginning of the session, and can in no case be remitted or reduced.

Promissory notes are not taken; it is contrary to the regulations of the College to accept them.

All tickets may be obtained from the Dean.

The matriculation ticket must be taken out before any other ticket can be obtained.

Students will be expected to exhibit their tickets to the Dean after the first two weeks of the session.

Graduates of this institution have perpetual free admission.

Graduates of any accredited regular school of medicine will be charged a fee of twenty-five dollars for attendance during a Winter session.

TEXT BOOKS.

The Faculty recommend the use of the following text-books, the one named first upon each subject in preference:

Roscoe's Lessons in Elementary Chemistry; Fownes's Chemistry.

Gray's or Wilson's Anatomy; Bellamy's Surgical Anatomy.

Klein's Elements of Histology.

Huxley's Lessons in Elementary Physiology (for Junior students); and *Foster's* or *Dalton's Human Physiology*.
National or U. S. Dispensatory. *Bartholow's* or *H. C. Wood's Therapeutics*; *Farguharson, Biddle*.
Green's Morbid Anatomy; *Virchow's Cellular Pathology*; *Heitzmann's Microscopical Morphology*.
Watson's Practice of Physic; *Niemeyer's Practice of Medicine*; *Bristowe's* or *Roberts's Theory and Practice*; *Bosworth's Diseases of the Throat and Nose*; *Loomis's Physical Diagnosis*.
West, Meigs and Pepper, or *J. L. Smith*, on Diseases of Children.
Billroth's or *Paget's Surgical Pathology*.
Ashhurst's, or *Bryant's Surgery*. *Ranney's Surgical Diagnosis*.
Playfair's, *Leishmann's*, or *Cazeaux's Midwifery*; *Boistiniere* on Obstetrical Emergencies and Operations. *Thomas, Munde* or *Goodell*, on Diseases of Women.
Nettleship or *Alt*, on Diseases of the Eye.
Wilson's Handbook of Hygiene and Sanitary Science. *Parker's Manual of Practical Hygiene*.
Taylor's Medical Jurisprudence.

The College is located on the north-east corner of Seventh street and Clark avenue. Students on arriving in the city are requested to apply to the Janitor for all required information as to boarding, etc. Letters addressed to any member of the Faculty will receive prompt attention. Physicians who may desire to receive the Annual Announcement regularly are requested to send their names and addresses to the Secretary of the Faculty, Dr. H. H. MUDD, No. 500 N. Jefferson Ave; notice of any change of residence is also desired. All further information may be obtained by addressing or calling upon the Dean, 3132 Washington Avenue.

WHITLEY, LANGLEY ST. AUBYN.....	Springfield, Ill.

MISSOURI DENTAL COLLEGE.

THE NINETEENTH ANNUAL SESSION will begin on Monday, Sept. 22nd, 1884, and continue until March 1st, 1885.

FACULTY.

A. LITTON, M. D.,	-	Professor of Chemistry and Pharmacy.
E. H. GREGORY, M. D.,	- - -	Professory of Surgery.
J. S. B. ALLEYNE, M. D.,	Professor of Therapeutics and Materia Medica.	
G. BAUMGARTEN, M. D.,	- - -	Professor of Physiology.
H. H. MUDD, M. D.,	- - -	Professor of Anatomy.
W. H. EAMES, D. D. S.,	Professor of the Institutes of Dental Science.	
A. H. FULLER, M. D., D. D. S.,	Professor of Operative Dentistry.	
W. N. MORRISON, D. D. S.,	-	Professor of Mechanical Dentistry.
J. C. HARPER, D. D. S.,	-	Demonstrator of Operative Dentistry.
F. G. ZENK, M. D., D. D. S.,	Demonstrator of Mechanical Dentistry.	
J. FRIEDMAN, M. D.,	- - -	Demonstrator of Chemistry.
FRANK R. FRY, M. D.,	- - -	Demonstrator of Anatomy.

The instruction by the Professor of the Institutes of Dental Science, and by the Professors of Operative and Mechanical Dentistry, will be both didactic and clinical.

Demonstrations will be given each day at the Infirmary in both Operative and Mechanical work, the great importance of clinical instruction being fully recognized.

Candidates for graduation must have attended two full courses of lectures, the first of which may have been in any accredited Dental or Medical School; but five years' practice will be considered as equivalent to one of these courses. He must pass a satisfactory examination in all the branches taught.

Graduates of the *St. Louis Medical College* will be entitled to examination for the *Degree of Doctor of Dental Surgery* upon attendance of one course of Lectures and the payment of \$75.00.

The curriculum is so arranged that the Dental student can, by the study of a few additional subjects, put himself in a position to enter, at the completion of his Dental course, the third or Senior class of the *St. Louis Medical College*, and eventually obtain the degree of Doctor of Medicine by one additional year's work.

Matriculation Fee,	- - - - -	\$ 5.00
Fees for each regular term, full course,	- - - - -	90.00

For further information, or for an announcement, apply to

H. H. MUDD, M. D., DEAN,
500 N. Jefferson Avenue, St. Louis.

QUIZ CLUB
OF THE
ST. LOUIS MEDICAL COLLEGE,
ESTABLISHED 1869.

The facts and theories presented in the lecture room are gleaned from a literature so extensive and an experience so broad, that it is impossible for any student thoroughly to comprehend and digest by his own efforts the course presented during the session. The QUIZ CLUB presents to the students an opportunity for the free discussion of the important points of the subject-matter of the lectures, and thus enables him to express concisely his views, corrects erroneous conceptions, fixes the salient points in his memory, and prepares him not only for the Green Room, but also for the emergencies of practice.

MEMBERS OF QUIZ CLUB.

DR. H. H. MUDD,	DR. JOHN P. BRYSON,
DR. WM. L. BARRET,	DR. M. H. POST,
DR. JOHN GREEN,	DR. J. FRIEDMAN,
DR. W. C. GLASGOW,	DR. W. A. McCANDLESS,
DR. JAMES M. SCOTT,	DR. F. R. FRY,
DR. W. E. FISCHER,	DR. B. J. PRIMM,
DR. W. G. HUNICKE.	

Examinations commence one week after regular Course begins, and will be held nightly during the entire session. One Quiz each week on every subject.

The Fee for the Course will be \$12.00.

For further information, inquire at the College of

J. FRIEDMAN, M. D., Secretary.

N.B.—Special Courses will be given, if desired, during the Winter and Summer sessions, in the different departments, to Students or Practitioners.

THE
ALUMNI ASSOCIATION
OF THE
ST. LOUIS MEDICAL COLLEGE.
